RE: WATER LICENCE APPLICATION FOR ENVIRONMENTAL SITE ASSESSMENTS AT THE IKHIL I-37 AND REINDEER C-36 FORMER WELLSITES, EAST-CENTRAL MACKENZIE DELTA, INUVIALUIT SETTLEMENT REGION, NORTHWEST TERRITORIES, SHELL CANADA LIMITED

Please find enclosed a Water Licence Application for Environmental Site Assessments at the Ikhil I-37 and Reindeer C-36 former wellsites (the Sites), on Inuvialuit 7(1)(A) Private Land in the east-central Mackenzie Delta of the Inuvialuit Settlement Region (ISR), Northwest Territories (the Project).

The objective of this Project is to obtain the necessary environmental and geotechnical information to determine if additional steps need to be taken to address potential risks at the Sites. Should the results of this Project indicate that remedial work (e.g., wood piling removal, soil remediation) will be required, a new Water Licence Application, including a Remedial Action Plan and Reclamation, Closure and Monitoring Plan, will be developed for this work and submitted to the Inuvialuit Water Board.

The attached application and associated appendices have been prepared by WSP Canada Inc. (WSP) on our behalf and with our support. Should you have any questions or comments, please do not hesitate to reach out to Kyle Thompson or Dave Kliewer, or the WSP contact listed within the attached documents.

Sincerely,

Kyle Thompson
