Attention: Executive Director

**Subject: Water Licence Renewal Application for the Hamlet of Paulatuk**

At the request of the Hamlet of Paulatuk, Dillon Consulting Limited (Dillon) has assisted to create their Water Licence Renewal Application (attached).

As part of the application, engineer stamped scale plan drawings of the sewage treatment system and solid waste disposal area were requested; however, these have not been included within the application. The sewage treatment facility uses a natural lake for disposal; therefore, it is expected that engineered drawings for the facility are not available. Similarly, engineered drawings were not located for the solid waste facility. The figures for the sewage treatment system and solid waste disposal area that are attached have been combined as the sites are collocated.

Other documentation that has been included as part of the water licence application includes updated operations and maintenance plans, an abandonment and reclamation plan, hazardous management plan and a spill contingency plan for the sewage lagoon and solid waste facilities.

Should you have any questions or concerns, please feel free to contact the undersigned at (867) 920 - 4555 ext. 4106.

Yours sincerely,  
Dillon Consulting Limited
