

**Hamlet of Paulatuk  
Water License #N7L3-1619  
Annual Report as per Part B: General Conditions  
For the year January to December 2005**

**Part A&B:**

**Schedule of Water delivered from New Water Lake**

<u>Month</u>	<u>Year 2005</u>
January	667,842
February	725,799
March	846,194
April	803,230
May	740,927
June	755,785
July	756,307
August	746,808
September	829,227
October	872,895
November	755,979
December	797,368
<b>Total Liters</b>	<b>9,298,361</b>
<b>Total Cubic Metres</b>	<b>9,298</b>

**PLEASE NOTE: Our waste water & sewage disposal should be approximately the same quantities as our water delivered.**

**Part C:**

All sites have undergone normal maintenance and the household garbage waste disposal site has been covered with ground when the cells have become full. We have received funding under the Gas Tax Fund and we will doing work this summer and fall on the solid waste site. We will also do some planning to order chain link and gate the property.

**Part D:**

"Surveillance Network Program" Kevin Glowa was here in August and did a site visit to the sewage lagoon and there was no sign of excessive runoff.

**Part E:**

There has been no unauthorized discharges.

**Part F:**

There has been no abandonment and/or restoration carried out. The covering and burying of household garbage is an ongoing exercise that we do as garbage cells fill up.

**Part G:**

There have been no recent studies and none are planned in the near future.

**Part H:**

There have been no such requests.

**Part I:**

Page 2 of 2

**Our sewage waste site is a lagoon and there has been no removal of waste from the site.**

**Part J:**

**The new O&M Manual has been filed with the board and that is the only changes to our Operation and Maintenance Plans. The only other plans we have at this time is that we are putting in our budget for 2005/06 plans to put up chain link fence around the southern area of the waste disposal site complete with an entrance gate. If we get this completed it will secure the site.**
