**SUBJECT: ANNUAL REPORT 2000 - WATER LICENSE N7L1-1762 CAMP FAREWELL**

The following is to provide the information required by Part B: 1. of the Water License General Conditions no later than March 31 of the year following the calendar year reported. The License was effective December 1, 2000 and therefore the following information is related to one month for 2000.

**1.a) Total Quantities Of Fresh Water Obtained From All Sources**

Mackenzie River 127.4 m3

**1.b) Total Quantities Of Each And All Waste Discharged**

No waste effluent water was discharged to the Mackenzie River. All waste water was held in the contingency sump. Due to load bearing ice conditions, we were unable to transport the waste treatment plant to site until January, 2001. The intent is to recycle the sump contents through the treatment plant.

There were no sludges from the treatment plant.

Domestic garbage was incinerated.

**1.c) Results Of Sampling Carried Out Under The Surveillance Network Program**

No discharging was done in December, therefore no sampling results.

**1.d) Summary Of Any Modifications Carried Out On The Water Supply And Waste Disposal Facilities, Including All Associated Structures**

No modifications were carried out.

**1.e) A List Of Any Spills And Unauthorized Discharges**

No spills or authorized discharges.

**1.f) Any Other Details On Water Use Or Waste Disposal Requested By The Board Within Forty-Five Days Before The Annual Report Is Due.**

No additional requests were received.

We trust this meets your requirements. Should any additional information be required, please contact the undersigned.

Yours truly,
