Dear Sir:

Re: MGM Energy Corp. Cuttings and Fluids Injection Facility at Aput C-43
Information Requests (IRs) #2 dated August 8, 2008

MGM Energy Corp. (MGM) acknowledges receipt of the National Energy Board's (NEB's) letter dated August 8, 2008 outlining Information Requests (IRs) #2 for the proposed Cuttings and Fluids Injection Facility at Aput C-43. MGM has prepared the attached IR responses.

We trust this information is satisfactory for your purpose. Please do not hesitate to contact Shirley Maaskant at (403) 781-7840 or by email at shirley.maaskant@mgmenergy.com should you require more clarification.

Yours truly,
MGM Energy Corp.

Shirley Maaskant
Manager, Regulatory and Community Affairs

Barb Chalmers, Secretary, Environmental Impact Screening Facility, fax 867-777-2610

IR Number: NEB – 2.1

Source: National Energy Board

To: MGM

Preamble:

In its Project Description, MGM states that it conducted public consultation with communities, local organizations and government agencies potentially affected by the Project in February and April 2008. MGM shared information with these groups to obtain community feedback, identify concerns as early as possible, and to gain community feedback and local knowledge about the Project area.

In Section 10 and Appendix C of the Project Description, MGM has provided the results of its consultation with community organizations and general public. However, MGM has not provided a meeting schedule or the results of its consultations with government agencies.

Request: With regard to MGM consultations with federal and territorial government agencies, please provide:

- a) a summary of issues or concerns raised and how these have been addressed by MGM.; and
- b) if possible, an approximated meeting schedule.

Response:

- a) The only issues or concerns raised was the uncertainty over whether the injection of cuttings and fluid would be regulated by the Northwest Territories Water Board or the National Energy Board and the class of Water Licence that would be required (Class A or B). MGM addressed this issue by submitting a Water Licence application to the Northwest Territories Water Board without specifying the class of licence.
- b) MGM did not document these meetings, however they can confirm that meetings (via telephone and/or in person) did occur between February and August 2008 with staff from Indian and Northern Affairs Canada, Northwest Territories Water Board, National Energy Board, Department of Fisheries and Oceans and Environment and Natural Resources – Government of the Northwest Territories.
