Subject: RE: NTPC - Aklavik Site Clean Up

Hi Mardy,

Yes, the project includes remediation of all impacted soil located on the site including impacted soil located under the fence. Due to space restrictions we are treating 1/3 of the impacted soil at a time. The final phase will include removing the fence and treating any impacted soil that was located under it.

Please let me know if you have any other questions.

Thanks,

Josh

Subject: NTPC - Aklavik Site Clean Up

Hi Joshua

Can you confirm that the recommendations from the 2004 Remediation Report are going to be addressed during the site clean up, specifically the location under the fence where there is potential for contaminated soil.

Thank you

Mardy
