**RE: BAR-C TUNUNUK POINT
 2025 ANNUAL REPORT FOR WATER LICENCE N7L1-1836**

As per the requirements listed in Part B.2 for Water Licence Number N7L1-1836, Imperial Oil Resources Ventures Limited (Imperial) is pleased to provide the Inuvialuit Water Board (IWB) with the 2025 Annual Report for the work completed at BAR-C (Tununuk Point; the Site). This water licence was renewed in 2020, and included updates to the following supporting documents:

- Monitoring Plan (Advisian 2020);
- Spill Contingency Plan (Advisian 2020); and
- Erosion, Sediment and Drainage Control Plan (Advisian 2020).

No work was conducted on site in 2025.

The following information was prepared by Worley Canada Services Ltd. (Worley), operating as Worley Consulting, on behalf of Imperial.

a) Water Usage from Water Source

No water usage was required at the Site during 2025.

b) Sewage Accepted by the Town of Inuvik

No sewage was generated or disposed of from the Site in 2025.

c) Non-Hazardous Waste

No non-hazardous waste generated at the Site in 2025.

d) Hazardous Waste

No hazardous waste was generated at the Site in 2025.

e) Waste Water Discharge

No waste water was generated at or discharged at the Site during 2025.

f) Bioremediation Facility Treated Soils

The bioremediation facility was decommissioned during the 2015 construction season. No further treatment of soils with Type B petroleum hydrocarbons is planned.

g) Surveillance Network Program Summary

The surveillance network monitoring stations (i.e., overland discharge points related to the remediation works) were decommissioned at the end of the 2015 construction season, as no further borrow material excavation or bioremediation was planned.

h) Monitoring Plan Summary

Capping of Landfills A and B was completed during the 2015 construction season. No additional thermistors or groundwater monitoring wells have been installed since 2015.

A summary of the tasks associated with the ongoing Monitoring Plan¹ for the landfills and waste disposal areas (WDAs) is presented below:

i. Groundwater Monitoring

No groundwater monitoring was completed in 2025. The next monitoring event is scheduled for Year 15 (2029).

ii. Post-Construction Monitoring

No post-construction monitoring or inspection of the landfills and WDAs was completed in 2025. The next monitoring event is scheduled for Year 15 (2029).

iii. Natural Environment Monitoring

No natural environment monitoring was completed in 2025. The next monitoring event is scheduled for Year 15 (2029).

i) Reclamation Activity Summary

No reclamation activities were conducted in 2025.

j) Modifications to the Reclamation Project

No modifications were made to the reclamation project in 2025.

k) Studies

No studies were required by the IWB in 2025, and no future studies are planned.

¹ Advisian, 2020. 2020 BAR-C Monitoring Plan Update. Inuvialuit Water Board – Water Licence N7L1-1836. Prepared for Imperial Oil. May 11, 2020.

l) Plan Updates

i. Waste Management Plan

No updates or revisions were made to this plan in 2025.

ii. Spill Contingency Plan

An updated Spill Contingency Plan was prepared by Worley in support of Imperial's Water Licence Renewal application in 2020. This Plan was submitted to the Inuvialuit Land Administration (ILA) and IWB for review and approval on May 11, 2020, and is effective as of July 1, 2020. No additional revisions were made to this plan in 2025.

iii. Quality Assurance/Quality Control Plan

No updates or revisions were made to this plan in 2025.

iv. Monitoring Plan

An updated Monitoring Plan was prepared by Worley in support of Imperial's Water Licence Renewal application in 2020. The initial Monitoring Plan was included as part of the Remedial Action Plan for the Site in 2013 and was reviewed and approved by the ILA prior to the initiation of remedial works on the Site in 2014. Phase I of Site monitoring was completed between 2015 and 2019 (Years 1, 3, and 5). The 2020 update presents Phases II and III. No technical changes were proposed in the updated Plan. No additional revisions were made to this plan in 2025.

v. Remedial Action Plan

Remedial works were completed on the Site between 2014 and 2016. No updates or revisions were made to this plan in 2025.

vi. Erosion and Sediment Control Plan

An Erosion, Sediment and Drainage Control (ESDC) Plan was prepared by AECOM as a requirement of the original Water Licence approval prior to the initiation of Site remediation activities in 2014. An updated ESDC Plan was prepared by Worley in support of Imperial's Water Licence Renewal application in 2020. This updated Plan specifically addresses Site activities associated with potential maintenance of the on-Site landfill capping systems and waste disposal area regrades. No further updates were made to this plan in 2025.

m) Discharges and Spills

No discharges or spills occurred in 2025.

n) Spill Training

Training on spill mitigation and clean-up procedures was included as part of the pre-mobilization discussions with on-Site staff and subcontractors during the project kick-off meetings or during Site orientation.

Closure

We trust that the information provided satisfies the conditions of the Water Licence Part B.2. Please contact the undersigned should you require any clarifications.

Yours sincerely,

Sidney Conlon
